SUMMARY

Passionate and self-taught Frontend Web Developer with knowledge of frontend (HTML, CSS, JavaScript, React.js) and Next Js technologies. Focused on building dynamic, responsive web applications and eager to contribute to real-world development teams. Strong problem-solving attitude and a hunger for continuous learning.

EDUCATION

Intermediate in Commerce
Govt. Pakistan Shipowner College, Karacih
2023 – 2025 (In Commerce)
Matriculation – Science Group
Govt. KAMRAN GRAMMAR SCHOOL, Karachi
Passed in 2023

TECHNICAL SKILLS

- Frontend: HTML, CSS, JavaScript (ES6+), TypeScript, Bootstrap, Tailwind CSS, React.js, Next.js
- Tools & Concepts: REST APIs, Responsive Design, Git & GitHub

PROJECT HIGHLIGHTS

1. E-Commerce Website (ReactJS + Tailwind CSS)
 Developed a responsive and modern e-commerce frontend using React and Tailwind CSS. Features product listing, categories, search filter, and dynamic cart UI.
2. ToDo List App (MERN Stack)
 A full-stack CRUD ToDo app with MongoDB, Express, React, and Node.js. Users can add, update, and delete tasks with real-time updates and toast notifications.
3. Weather App (JavaScript + OpenWeather API)
 Created a live weather app using Vanilla JS and OpenWeatherMap API. It fetches real-time weather data based on city input with clean UI and temperature visuals.
4. Portfolio Website
 Built a personal developer portfolio using HTML, CSS, and JavaScript to showcase projects, skills, and contact information. Fully responsive across devices.

updates.
